

Cannabis Use Disorder

Cannabis use disorder (CUD) is the continued use of cannabis despite impairment in psychological, physical, or social functioning.¹

200 million people suffer from CUD worldwide. ²

14 million people suffer from CUD in the US. ³

Teens with a CUD have at least a 3-times greater risk of adverse mental health outcomes. 4

In 2021, 52.5 million Americans used marijuana, making it the most commonly used illicit drug. ⁵

Individuals who use manijuana daily are 33% more likely to develop coronary artery disease (CAD). ⁶

Teens who use cannabis recreationally have at least a 2-times greater risk of a dverse mental health outcomes. ⁴
